

## CARNEGIE LIBRARY

(Continued from Page 1)  
History of Library.

The splendid new library is an outgrowth of the activities of the Honolulu Library and Reading Room Association, the Hawaiian Historical Society and individuals who looked ahead and saw the need for an institution of this kind, a free library.

More than two years ago negotiations were entered into between Governor Frear and Andrew Carnegie with the intention of securing a Carnegie gift. The Honolulu Library and Reading Room Association and the Hawaiian Historical Society cooperated to back up local efforts to secure the gift and consented to combine in one library.

Mr. Carnegie then announced through the Governor his willingness to give \$100,000, provided the territorial legislature would give \$10,000 a year as a maintenance fund.

In 1909 the Legislature made the necessary appropriation and the same act provided for the founding of a library of Hawaii. Under the terms of the act it is provided that the library shall be a free circulating public library. Provision was also made that if the Honolulu Library and Reading Room Association should give the use of its books and income from its investments, it should name three trustees of the board governing the library of Hawaii; that if the Hawaiian Historical Society should give the use of its books and other library property, it should name one trustee, and the Territorial Government reserved

to itself the right to name three trustees, making seven in all on the board.

Pursuant to this Act, agreements were entered into between the Honolulu Library and Reading Room Association and the Hawaiian Historical Society in the year 1909, and it was then that these matters being presented to Mr. Carnegie, and the Governor later having a personal interview with him, the donation was made.

### Trustees Named.

Following the conditions of the legislative act, the Territory named as its trustees on the board the Hon. W. L. Whitney, W. F. Dillingham and W. H. Babbitt. The Honolulu Library and Reading Room Association named C. H. Atherton, J. H. Fisher and P. L. Weaver, and the historical society named A. Lewis, Jr., as its trustee.

A site committee was named, composed of Messrs. Weaver, Babbitt and Fisher. Finally the bungalow site on the capital grounds was selected. The opinion prevailed, however, that the bungalow site might result in an overcrowding of the buildings on these grounds and the Pohukaina school site was finally selected, with a frontage on King street and lying between Punchbowl and Likelike streets.

### Legislature Helps.

The building committee was then named, consisting of A. Lewis, Jr., chairman, W. F. Dillingham and C. H. Atherton. After a canvass the committee selected Whitfield & Parker, of New York city, as the architects, with H. L. Kerr of Honolulu as superintending architect. After bids were first called and opened, it was found that the building as desired by the various organizations to occupy it could not be constructed and furnished for \$100,000. The Legislature of 1911 was appealed to and gave \$25,000 additional, making a total of

\$125,000. A change in plans was made, and the Lord-Young Engineering Company were for the second time successful bidders for the contract, the final figure for construction being \$104,000.

Work was begun immediately, some four months ago, and has progressed rapidly ever since.

The site, while not close to the business center of the city, is regarded as admirable for library purposes, and the extension of the business district to the eastward, it is predicted, will ultimately bring it in closer relationship with the main portion of Honolulu.

Governor Frear yesterday promulgated Executive Order No. 11, by virtue of which the site of the library is set aside forever for public library purposes, the building to be under the direction of the trustees of the library, subject, however, to the use of a part of it by the Pohukaina school, until the school is removed.

### A BALD-HEADED WOMAN

Shorn of Her Crown of Beauty, Loses in Love and Marriage.

Hair is certainly most necessary to woman. Who could love and marry a bald-headed woman? What charms could one array to offset such a disfigurement?

A woman's goal is usually love and marriage. Her crowning glory is her hair. The loss of her hair mars her beauty, happiness, and success. Yet, right here in Honolulu, there are thousands of women who are neglecting or injuring their hair to such an extent that it is only a matter of time when it will be utterly ruined.

Many women destroy the beauty of their hair through thoughtlessness or ignorance of certain facts. They use curling irons over-heated, or to excess, which destroys the natural oil of the hair, causing it to split, break, and come out. They do not shampoo their hair often enough, or too often. They use soaps or preparations which contain ingredients positively harmful to the scalp and hair.

As a result of such treatment, dandruff is created, the hair loosens, loses color, falls out, and baldness commences, unless proper and prompt precautions are taken in time. Then again, microbes and certain diseases bring about unhealthy scalp and hair conditions.

Almost any woman may rid herself of dandruff and diseased scalp and hair if she will but use the right remedy. We have that remedy, and we will positively guarantee that it will either cure dandruff and baldness or it will not cost the user anything.

That's a pretty broad statement, but we will back it and prove it with our own money. We will return your money if you do not find that Rexall "93" Hair Tonic is an entirely satisfactory remedy that will promote hair growth and overcome scalp and hair troubles; that it will grow hair even on bald heads, unless all life in the hair roots has been extinguished, the follicles closed, and the scalp is glazed and shiny. It gets its name from the fact that it grew hair in 93 out of 100 cases, where it received a thoroughly hard, impartial, and practical test.

We want you to try Rexall "93" Hair Tonic at our risk. You surely cannot lose anything by doing so, while you have everything to gain. You had better think this over, and then come in and see us about this offer. You will be well repaid for your visit to our store. Remember, you can get Rexall Remedies in this community only at our store—The Rexall Store, Benson, Smith & Co., Ltd., Fort and Hotel streets.

### KILAUEA READY FOR TRIAL RUN

President and General Manager J. A. Kennedy of the Inter-Island Steam Navigation Company is in receipt of some very encouraging and pleasing information concerning the progress made on the handsome new passenger steamer Kilauea, now under construction at the Union Iron Works, San Francisco.

By the Sierra this morning was received the announcement that the Kilauea would be ready for a trial run the latter part of the present month.

Under the direction of Superintendent Johnson of the Inter-Island company, the machinery is about all installed, and the last and final touches are taking up the time and attention of the large force of machinists.

The vessel is so near completion that it is expected the trip to the Islands will be undertaken before the middle of November.

The Kilauea will bring down sufficient heavy cargo to serve the purpose of ballast. It is generally understood that Captain William Freeman will guide the new vessel on her maiden voyage in the waters of the Pacific.

### SOME FIGURES FOR

American athletes in general are interested in the fifth Olympiad, which is to be held in Stockholm next year the particulars of which have just been announced. The sports will be held under the patronage of the king of Sweden, and the direction of the Swedish Olympic committee. The president of the athletic subcommittee is Col. V. G. Balck.

The track sports and swimming, in all likelihood the only games in which Americans will make entry in the Olympics, will be held during the period between July 6 and July 15, the entries for which will close June 6.

The detailed dimensions of the track and field are as follows: Length of one lap, 383 meters; breadth of finishing straight, 10½ meters; breadth of backstretch, 7½ meters; shortest radius, 28 meters; maximum slope, 0.50 meters. The arena is 67½ by 148 meters, and the football field, 65 by 104 meters.
